Product OVERVIEW

Today's approach to planning construction is manual and complex: costs and risks are too high.

Shoreline's AI construction planning solutions automate and optimize work and resource plans to save time and reduce risk. Shoreline's construction solutions integrate, automate, and optimize wind farm construction, resource

management, and reporting for EPCIs and developers. Receive unparalleled insights into availability, and resource utilization. Assess weather and project risks, and predict where obstacles could arise in the construction planning phase.

KEY FEATURES

01

Construction Checklists: Streamline event and incident reporting.

04

Mobile Access: Real-time data entry and updates directly from construction sites to ensure alignment.

07

Risk Assessments: Assess weather and project schedule risk and predict where obstacles could arise avoiding delays, cost overruns, and supply chain issues.

02

Daily Progress Reporting: Automate reporting and performance forecasting.

05

Scheduling and Resource Allocation: Automated scheduling to optimize crew deployment, equipment use, and delivery.

08

Performance Benchmarking: Enable shared performance data, benchmarking, and feedback loops between sites, set against operational and financial KPIs.

03

Site Overviews: Intelligent location, inventory, and progress tracking.

06

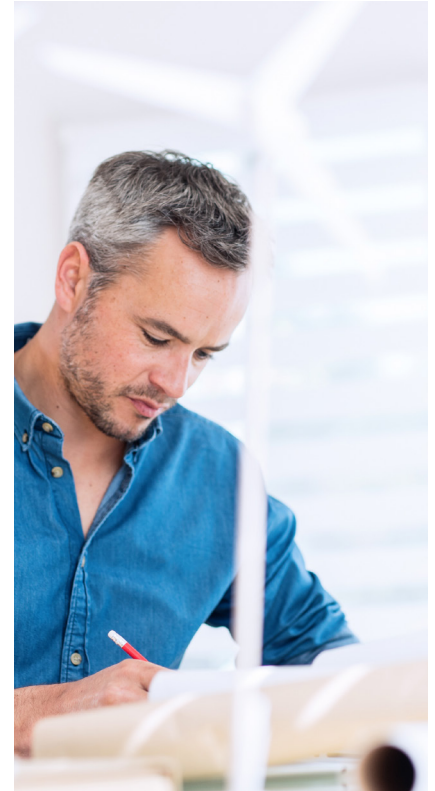

Simulation Modeling: Enable precise forecasting and quick resolution of potential bottlenecks with real-time data.

09

Dashboard Analytics: Receive unparalleled insights into costs, availability, resource utilization, project milestones, timelines, progress, and dependencies.

Product BENEFITS

- ✓ **Reduced Delays**
Efficient scheduling and proactive issue resolution to keep projects on track.
- ✓ **Reduced Costs**
Optimized resource management reduces labor and equipment costs.
- ✓ **Improved Communication**
Real-time updates ensure all stakeholders are aligned, minimizing rework and misunderstandings.
- ✓ **Data-Driven Decisions**
Real-time insights for proactive management.

TECHNICAL SPECIFICATION

Integrate your trusted systems and unite your data in one place. Say goodbye to countless interfaces, local information storage, and searching through scattered spreadsheets and documents.

03

Security: Single-tenant, company-specific, and isolated private cloud. Enterprise-grade data security and GDPR compliance.

01

Generic API: Integrate your data from your trusted systems with generic APIs and 3rd party integrations.

04

Data sharing: Ensure data is easily available and maintained by sharing data and results between a project team.

02

AWS Hosting: In Europe (Frankfurt) and redundant setup with multiple availability zones and infrastructure as code.

05

Multi-language: Built to support any language on demand.
